

University College Dublin Ireland's Global University

MASTER OF REGIONAL & URBAN PLANNING (TWO YEARS FULL TIME)

In today's complex and rapidly changing world, with the threats posed by climate change, economic crisis and rapid urban growth, planners face the challenge of creating places that combine environmental quality with a vibrant economy, quality of life and distributive justice. This two-year professional planning degree develops the requisite conceptual knowledge and practical skills required by planners in this increasingly complex environment. You will develop an understanding of the administrative, legal and policy frameworks in which spatial planning operates and the social, political,

economic and environmental challenges facing planning. In addition students develop practical skills for plan and policy making, including environmental assessment, retail assessment, public participation methods, development and project management, and GIS.

Depending on your interests, you choose to

specialise in either development and design, or environmental planning. The Master of Regional and Urban Planning (MRUP) is accredited by the Royal Town Planning Institute (RTPI) and the Irish Planning Institute (IPI) and these qualifications are recognised internationally.

LEADING RESEARCH CENTRE IN SPATIAL PLANNING

The UCD School of Architecture, Planning & Environmental Policy has an established international track record as a leading research centre in spatial planning and is in the Top 150 QS World University Rankings by subject area. The School is a member of the Association of European Schools of Planning and has an exchange programme with the University of Illinois in Chicago.

WHY STUDY AT UCD?

Tradition

Established 1854, with 160 years of teaching and research excellence

Global profile

UCD is ranked in the top 1% of higher education institutions worldwide

Global community

Over 8,000 international students from over 139 countries study at UCD

Global careers

Degrees with high employability; dedicated careers support; 2 year stay-back visa (for non-EU students)

Safety

Modern parkland campus with 24 hour security, minutes from Dublin city centre

COURSE CONTENT AND STRUCTURE

120 credits taught masters

90 credits taught modules

30 credits

CORE MODULES INCLUDE:

- Planning, Society and Diversity
- Placemaking
- Geographical Information Systems for Policy and Planning
- Economics and Property Markets
- Research Design & Methods
- Urban and Regional Development
- Leadership, Development and Project Management
- Planning and Development Methodology

- Rural and Landscape Planning
- Planning Law
- Economics and Property Markets
- Planning Studio Project
- Environmental Assessment

The MRUP actively engages students in their own learning utilising a mix of lectures, workshops, group projects in a studio setting, field trips, regular student presentations, and independent research.

Graduates of the MRUP are to be found working as professional planners in the public and private sector, as GIS consultants, as policy advisors, property development consultants, and as community & rural development coordinators.

Our graduates have found employment with: national and international planning agencies, government departments, local authorities including urban and rural authorities in Ireland, the UK, Australia and New Zealand; transportation agencies including the National Transport Authority; planning consultancy firms including Tom Philips and Associates, John Spain Associates and Future Analytics consulting; urban regeneration companies, large house builders including Glenveagh Properties; wind and solar energy companies including Eirgrid and ABO Wind, and environmental NGOs including An Taisce.

This programme receives significant interest so please apply early online at www.ucd.ie/apply

ENTRY REQUIREMENTS

- A bachelor's degree with a minimum upper second class honours (NFQ Level 8) or international
 equivalent in any academic field, but with a preference for fields of study related to planning.
- Applicants whose first language is not English must also demonstrate English language proficiency of IELTS 6.5 (no band less than 6.0 in each element), or equivalent.
- Students who do not meet the IELTS requirement may wish to consider taking the Pre-Sessional or Pre-Masters Pathway. Full details https://www.ucd.ie/alc/ programmes/pathways/

INTERNATIONAL STUDENTS

- Option to stay in Ireland to seek employment and/or work for 2 years after graduating
- Approved by US Dept. of Education for federally supported loans
- Apply for University non-EU Scholarships: www.ucd.ie/global/study-at-ucd/ scholarshipsfinances/scholarships/
- Apply for College of Engineering & Architecture non-EU scholarship: www.ucd.ie/ eacollege/study/noneuscholarships/

RELATED MASTER'S PROGRAMMES OF INTEREST

- MSc Urban Design & Planning
- MSc Environmental Policy

GRADUATE PROFILE

Hannah Breshears
Tom Phillips & Associates

I completed the Master of Regional and Urban Planning in UCD in 2016. I was working for an architecture firm in the US at the time and looking for a way to transition into the European job market. As an international student, I found the ancillary courses in Irish planning law, European property markets and comparative planning from the MRUP program to be particularly helpful, as they gave me the foundation I needed to engage with an unfamiliar industry and understand some of the cultural context at play in Irish policy making. The program also provided excellent opportunities to network with professional planners in Ireland, which gave our class a helpful snapshot of the various career paths available in the area. I completed an internship with a large private planning consultancy in Dublin that was offered by one of the UCD guest lecturers over the summer and accepted a permanent position there shortly after graduation. My job has evolved somewhat since then, and I now lead the research efforts at the firm as a Geospatial Analyst, a position which combines traditional town planning expertise with more technical data management skills (using GIS software and other related BIM tools).
