Ireland's Global University

MSc in Applied Economics (One Year Full Time)

This course provides high quality training in economics with a focus on applications to real world problems. The course is ideal preparation for a career as a professional economist working on applying economics to policy issues or business situations. In addition to studying core modules in microeconomics, macroeconomics and econometrics, students can choose from a wide range of field modules. Students also have the option of completing a two-term specialisation in one of Behavioural Economics, Law and Economics of Competition, Environmental and Energy Economics or Development Economics.

In the summer semester, students do either a supervised research thesis or an internship. Students can switch after the first semester to our MSc in Quantitative Economics, which focuses on applying advanced mathematical and statistical methods to economics.

This programme features small group teaching from leading economists and a supportive environment. Masters students are an integral part of our School community, attending research seminars and receiving a wide range of supports to help them prepare for their research thesis or internship.

Ireland's leading economics department

UCD School of Economics is Ireland's leading economics department. Our staff are experts with international reputations in a wide range of topics such as macroeconomics, econometrics, applied microeconomics, behavioural economics, health economics, international trade and economic history. School members play a significant role in debating economic policy issues and in contributing to the formulation of economic policy. Students get to know our staff via participation in small classes and seminars and through direct supervision.

Career Opportunities

Many graduates of our masters programmes have gone on to complete PhDs in economics and pursue successful careers as academic or research economists. Many others have moved directly to employment in central banks, think-tanks, government departments, regulatory agencies, financial sector institutions and consultancy firms. Graduates have undertaken successful internships at a range of prestigious institutions such as the European Central Bank, the National Treasury Management Agency and the Central Statistics Office.

Graduate Profile

Guneet Kaur MSc in Applied Economics

The MSc. in Applied Economics is an excellent programme for students who wish to further specialize in economics. It's a challenging yet a very interesting course. Faculty at the UCD School of Economics are fantastic and are always there to guide you through the course. It's a well-designed curriculum, with an exceedingly large list of modules to choose from and the small class sizes guarantees a friendly atmosphere. The course work provides a rigorous grounding in the core components of modern economic analysis and I really liked the fact that I could do an Internship which helped me built my competencies further in the field. The course work gives a solid technical grounding in micro, macro, and econometrics but you were also encouraged to think about the real world behind the equations. It is a demanding programme, but that is you want a master's programme to be. This course provides you with a range of career options both in Ireland and abroad. On finishing my master's I am now pursuing my career in economic consulting. I'm currently Interning with Indecon Economic Consultants.

Fees

Fee information at www.ucd.ie/fees
