<h2>Academic Year 2019/2020</h2>

This module introduces the student to the key principles/theories of management and leadership, quality improvement, and information management systems. It provides the student with an understanding of how management and leadership, quality improvement and the information impact within the clinical practice. Issues concerned with maintaining quality in nursing/midwifery and health care, including change management, and clinical audit will be further explored. Additionally, students will be introduced to a number of methods and tools that may be used to measure quality in healthcare. The effect of informatics on the healthcare consumer as well as professional practice, administration, research and education are also explored.
