<h1 class="pageTitle"> MSc Urban Design & Planning FT (W332) </h1>  
<h2> </h2>

<p>It provides specialist knowledge and skills in: urban design theory; urban conservation; risk, resilience and sustainability; as well as social science research methods applied to the built environment. The programme will enable graduates to work as part of a multidisciplinary team to create better places through urban design. Students will also have the opportunity to draw upon the School's research expertise to place design centre-stage in tackling a range of pressing environmental and other issues.</p>

<p>This programme will&nbsp;equip planners and others working in related areas with the capacity to develop urban design solutions, to analyse them critically and to provide guidance in regards to their implementation one for which there is a growing demand. This includes traditional urban design concerns surrounding the urban public realm, residential quality etc., but also emerging challenges surrounding the role of urban design in mitigating or adapting to climate change, the role of design in promoting 'healthy' cities or neighbourhoods, and the incorporation of 'nature' into design (e.g. bio-mimicry) to address biodiversity loss.</p>

<p>The MSc Urban Design & Planning is accredited as a specialist qualification by the Royal Town Planning Institute.</p>
